

OhioHealth

BELIEVE IN *WE*™

OhioHealth's Administrative Fellowship program is excited to be recruiting candidates for the 2022-2024 cohort! Eligible candidates include those who will have completed a healthcare-related master's degree program within 12 months of beginning the fellowship, typically an MHA, MPH, or MBA. OhioHealth is planning to welcome four new fellows in the summer of 2022. Candidates from underrepresented backgrounds are strongly encouraged to apply.

The OhioHealth Administrative Fellowship program is a two-year, immersive experience, with each year focusing on specific core competencies of leadership. The goal of year one is to provide a foundation for Fellows as they begin their career as leaders. Fellows will participate in project- and experiential-based learnings as they complete rotations with leaders within their assigned care site or business unit. The second year of the fellowship program aims to develop management competencies by placing Fellows in an interim management position. In this role, Fellows are responsible for managing a team of direct reports and overseeing departmental budgets, while benefiting from the mentorship of both their senior executive preceptor and a director within their business unit.

Throughout both years, Fellows have the opportunity to participate in executive briefings and gain wide exposure to senior level leadership as they hone the competencies of successful OhioHealth leaders.

The flyer included below contains additional information regarding the OhioHealth Administrative Fellowship program and the application process. This information can also be found on our [website](#). We will be hosting two upcoming informational webinars that we welcome you to join. These sessions are open to any parties interested in learning more about this opportunity, not just those considering applying this cycle.

You may register for one of these sessions by following this link:
